PayStay

Pay-by-cell

PayStay pay-by-cell is a light, streamlined digital payment solution. It's perfect for quick digital payments or for occasional users—such as visitors or vacationers—who want a fast and convenient way to pay without any extra steps. This service makes parking simple, with no sign-ups, or long-term commitments required.

PayStay pay-by-cell offers a highly streamlined web-app experience for maximum ease of use:

- There is absolutely no download or onboarding process required
- Users scan a QR code, Text to Pay or tap a Metro LITE Virtual meter using secure near field communication
- Motorists enter their vehicle license plate and pre-select the amount of time they need
- Payments are accepted via Google Pay, Apple Pay, or credit card
- For complete transparency, the full cost of the parking session inclusive of transaction fees is shown on the screen, so the end-user always knows what they're paying for
- Once the payment is processed, a receipt is available to download or to have emailed to a nominated address
- Orikan is a PCI-DSS certified company. Users of our products can always rest easy knowing that we hold ourselves to the highest industry standard of payment data security

THE PAYSTAY DIFFERENCE

- PayStay pay-by-cell is an established proven solution with a large existing user base
- Simple, intuitive and easy to use motorists simply scan the QR code when they park their vehicle. They can also use any Metro LITE Virtual meter in the same way
- Reduce your costs, improve streetscapes, and manage the rationalisation of existing parking meters with the PayStay solution that anyone can use
- PayStay pay-by-cell offers the same seamless integration with PinForce enforcement suite as well as a variety of parking meters and off-street parking management tools, as PayStay always has
- The solution is developed and supported in-house by Orikan
